

# **Bulldog Head Nodding / shakes**

<http://www.surveymonkey.com/s/headbobbinginbulldog>

If anyone has ever had head nodding with your bulldogs would they be interested in helping out Dr Hoger Volk Head of Neurology & Neurosurgery at The Royal Veterinary College, who addressed The Bulldog Club Inc. Seminar in June this year he was interested in the number of questions that were brought up re Head Tremors in Bulldogs.

He offered to do some research and has put this questionnaire together for Bulldog breeders & owners to complete on line Please would you help by publicising and adding to emails you send to bulldoggers.

## Characterisation of head bobbing in Bulldogs

At the Royal Veterinary College, we would really like to hear from your experience with your pet having head bobbing. Interestingly, there is very little known about this episodic disorder and we were not able to find any scientific description of it. Your expertise will help us to characterise this condition better.

The aim of this questionnaire is to gather a pool of data to enable us to understand the condition better. Eventually, localising the origin of the condition could lead to answers and hopefully a treatment for this possible distressing condition.

The survey should take no longer than 20 minutes to complete. Once you begin, you cannot save and complete the survey at a later time.

Please only fill out ONE survey per household; you will need to think about ONE dog you own or have recently owned to complete this survey.

The data collected in this survey will be stored securely at the Royal Veterinary College and your individual survey answers will be anonymous and untraceable. Completion of the survey indicates your consent to participate in the study. You may cancel your participation at any point by closing your browser (responses cannot be collected for unfinished surveys).

Please feel free to add your contact details in the beginning of the questionnaire, if you are happy for us to contact you with the study results and to clarify any possible queries. Your contact details will only be assessable by the investigators in this study and will not be given to any 3rd party.

If you have any questions or comments, please contact Julien Guevar : [bulldogstudy@gmail.com](mailto:bulldogstudy@gmail.com)

Thank you!

Julien Guevar and Holger Volk
